

### **Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

### **Listing of Claims:**

1. (Cancelled)
2. (Currently Amended) A printing fluid dispenser according to claim 16, wherein the reservoir comprises a deformable container ~~located within the housing and wherein bringing the first and second portions towards each other causes compression of said container.~~
3. (Cancelled)
4. (Currently Amended) A printing fluid dispenser according to claim 36, wherein the complementary features comprise one or more complementary protrusions formed into opposing walls of the base and plunger.
5. (Cancelled)
6. (New) A printing fluid dispenser comprising:  
a base defining a reservoir of printing fluid and an outlet for establishing fluid communication between the reservoir and the dispenser exterior; and,  
a plunger for telescopically engaging the base in order to compress the reservoir;  
wherein,  
the base and the plunger have complementary features that mate together to prevent relative movement of the plunger and the base until a threshold force is manually applied to the plunger to disengage the complementary features and allow the plunger to move relative to the base when a dispensing force is manually applied to the plunger such that printing fluid is dispensed from the outlet, the dispensing force being substantially less than the threshold force.
